## AMENDMENTS TO THE CLAIMS

This listing of the claims will replace all prior versions, and listings, of claims in the application:

1-81. (Cancelled).

82. (Currently Amended) An isolated antibody or a fragment thereof, wherein the antibody or the fragment thereof recognizes a mammalian GBS toxin receptor or a polypeptide fragment thereof, and wherein the GBS toxin receptor has at least about 86% identity to SEQ ID NO:8.

83-84. (Cancelled).

- 85. (Previously Presented) The isolated antibody or the fragment thereof of Claim 82, wherein the mammalian GBS toxin receptor is expressed on a surface of a cell.
- 86. (Previously Presented) The isolated antibody or the fragment thereof of Claim 82, wherein the isolated antibody is a monoclonal antibody or a polyclonal antibody.
- 87. (Currently Amended) The isolated antibody or the fragment thereof of Claim 82, wherein the isolated antibody or the fragment thereof is generated by a method comprising immunizing an animal with the mammalian GBS toxin receptor or the an immunogenic polypeptide fragment thereof having at least six amino acids.
- 88. (Previously Presented) The isolated antibody or the fragment thereof of Claim 82, wherein the isolated antibody is a rabbit antibody or a mouse antibody.

U.S. Patent Application No. 10/823,506 Second Amendment and Response to Final Office Action Page 3

89. (Currently Amended) The isolated antibody or the fragment thereof of Claim 82, wherein the isolated antibody recognizes an extracellular domain of the GBS toxin receptor or the polypeptide fragment thereof.

90-96. (Cancelled)

97. (Currently amended) A composition for detection of a GBS toxin receptor or a polypeptide fragment thereof, comprising a reagent for detection of the GBS toxin receptor or the polypeptide fragment-thereof, wherein the GBS toxin receptor has at least about 86% identity to SEQ ID NO:8, and wherein the reagent for detection of the GBS toxin receptor is an isolated antibody or a fragment thereof.

98. (Cancelled)

99. (Currently Amended) The composition of Claim [[98]] <u>97</u>, wherein the isolated antibody or the fragment thereof recognizes the mammalian GBS toxin receptor <del>or the polypeptide fragment thereof</del>.

100-101. (Cancelled).

- 102. (Currently Amended) The composition of Claim 97, wherein the GBS toxin receptor or the polypeptide fragment thereof is detected in a cell or a tissue of an animal or a human.
- 103. (Previously Presented) The isolated antibody or the fragment thereof of Claim 82, wherein the isolated antibody or the fragment thereof is an inhibitor of binding of a GBS toxin to the mammalian GBS toxin receptor.
- 104. (Currently Amended) An isolated composition comprising an antibody or a fragment thereof, wherein the antibody or the fragment thereof recognizes a mammalian GBS

U.S. Patent Application No. 10/823,506 Second Amendment and Response to Final Office Action Page 4

toxin receptor or a polypeptide fragment thereof, and wherein the GBS toxin receptor has at least about 86% identity to SEQ ID NO:8.

105. (Previously Presented) The isolated composition of Claim 104, wherein the composition is isolated from an animal or a human.
